Email: jolttimberworks@gmail.com

Features

Premium Cedar Frame: Built with tight-knot kiln-dried cedar, we carefully select high-quality boards for their rich color, natural beauty, durability, and resistance to the elements.

Glazing: Twin-wall polycarbonate, a lightweight and cost-effective alternative to traditional glass, offering excellent insulation and protection.

Automatic Roof Vent: Hands-free automatic roof venting is provided by a non-electric roof vent opener for optimal ventilation.

Handcrafted Cedar Door: Our standard cedar door swings outward on the 6' x 4' model. A Dutch door may also be available as an upgrade.

Cedar Shelving: Beautiful, handmade cedar shelves come standard. Choose between two sidewall benches or one long rear bench to optimize your growing space.

Basewall Ventilation: Each greenhouse includes a basewall vent with a cover, which allows you to seal it up during the colder months.

Prefabricated for Easy Assembly: Your greenhouse is prefabricated in our shop and shipped to you for quick and simple assembly.

Delivery & Shipping

Local Delivery (Pacific Northwest Only): We offer local delivery within 100 miles of our shop in St. Helens, OR. The kit will arrive with pre-assembled end walls, sidewalls, roof sections, and basewalls for easy setup.

Shipping by Common Carrier: For customers outside our delivery area, we ship greenhouse kits via common carrier. You'll receive tracking information via email, and the carrier will contact you to schedule delivery. The kits are securely crated for protection.

Please Note: Shipping and delivery costs vary depending on your location. For local delivery, expect a charge between \$300 and \$500. For shipping via common carrier, costs generally range from \$1,500 to \$2,000. Contact us for an exact shipping quote based on your address.

What's Included in the Kit

We prefabricate your entire greenhouse, label all components, and deconstruct the sidewalls and roof for easy reassembly. End walls arrive fully assembled, with the door pre-hung in its jamb. The basewall is preassembled into sections. Our goal is to strike a balance between shipping costs and ease of assembly.

Standard Features are:

- 1 Roof vent with automatic opener
- Handcrafted cedar door
- Twin-wall polycarbonate glazing, pre-cut
- Caulk to seal the glazing
- Cedar shelving (Choose either 1 bench at 6' or 2 benches at 4')
- Basewall vent
- All necessary hardware for assembly
- Detailed assembly instructions
